## General Information & Definitions

### Execution Fees

Transactions undertaken on the Dowgate MTF are subject to execution fees. The fees for each product are set out in the tables contained in this fee schedule. These fees are based on a combination of:

- a) the type of trade, i.e. whether an outright trade or a switch;
- b) the maturity band of the instrument selected;
- c) the product type selected; and
- d) the delivery method chosen.

For example, a trade in a UK Gilt may attract a different charge under the Dowgate Gilts fees as opposed to Dowgate Credit, Covered bonds, Sovereigns, Supras & Agencies even if they are in the same maturity band.

### Payment of Fees

The Dowgate MTF fees are paid by Participants in the following manner:

Settlement protocol	Method of payment
<b>Undisclosed protocol</b>	Trades under the undisclosed protocol are settled matched principal against an affiliate company of the Dowgate MTF. Fees for trades settled under the undisclosed protocol will be included in the price that the Participant settles on.
<b>Disclosed protocol</b>	Trades under the disclosed protocol are settled by way of a name give up transaction. Fees for trades settled under the disclosed protocol will be calculated on a monthly basis and an invoice sent to the Participant for payment.

### Definitions

Defined Term	Definition
<b>Aggressor</b>	The Participant who actions (“hits” or “takes”) a price input by another user.
<b>Gap Charge</b>	Gap Charge means that the charge is only applicable to the maturity difference on the Swap spread. For example, if switching between 15 year and 20 year, the gap charge would be applicable to the 5 year difference.
<b>Passive Fee</b>	The fee chargeable to a Participant who posts a lit price on the Dowgate Sterling Swaps screens which is actioned by an Aggressor.
